

§ 407.82

40 CFR Ch. I (7–1–00 Edition)

(k) The term *tomato-starch-cheese canned specialties* shall mean canned specialties resulting from a combination of fresh and pre-processed tomatoes, starches, cheeses, spices, and other flavorings necessary to produce a variety of products similar to but not exclusively raviolis, spaghetti, tamales, and enchiladas.

(l) The term *medium* shall mean a point source that processes a total annual raw material production of fruits, vegetables, specialties and other products that is between 1,816 kkg (2,000 tons) per year and 9,080 kkg (10,000 tons) per year.

(m) The term *large* shall mean a point source that processes a total annual raw material production of fruits, vegetables, specialties and other products that exceeds 9,080 kkg (10,000 tons) per year.

(n) The term *annual average* shall mean the maximum allowable discharge of BOD₅ or TSS, as calculated by multiplying the total mass (kkg or 1000 lb) of each final product produced for the entire processing season or calendar year by the applicable annual average limitation.

(o) The terms *maximum for any one day* and *average of daily values for thirty consecutive days* shall be based on the daily average mass of final product produced during the peak thirty consecutive day production period.

§ 407.82 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best practicable control technology currently available.

Except as provided in §§ 125.30 through 125.32, any existing point source subject to this subpart shall achieve the following effluent limitations representing the degree of effluent reduction attainable by the application of the best practicable control technology currently available (BPT):

(a) The following limitations establish the quantity of BOD₅ controlled by this section, which may be discharged by a “medium” or “large” existing point source subject to the provisions of this subpart after application of the best practicable control technology currently available. Any food specialty plant which continuously or intermittently discharges process waste water

during the processing season shall meet the annual average, maximum thirty day average, and maximum day BOD₅ limitations. Food specialty plants employing long term waste stabilization, where all or a portion of the process waste water discharge is stored for the entire processing season and released at a controlled rate with state approval, shall meet only the annual average BOD₅ limitations. Effluent limitations for the soups subcategory are based upon pounds (lb) or kilograms (kg) of pollutant per 1000 pounds (lb) or kilograms (kkg) of raw ingredients.

[Metric units, kg/kkg of final product; English units, lb/1,000 lb of final product]

Commodity (specialties)	BOD ₅ effluent limitations		
	Maximum for any 1 day	Average of daily values for 30 consecutive days shall not exceed—	Annual average shall not exceed—
Added ingredients	0.95	0.55	0.36
Baby food	1.23	0.73	0.51
Chips:			
Corn	1.58	1.04	0.80
Potato	3.46	2.17	1.58
Tortilla	2.41	1.50	1.09
Ethnic foods	2.39	1.41	0.96
Jams/jellies	0.42	0.26	0.19
Mayonnaise and dressings	0.37	0.24	0.17
Soups	4.14	2.46	1.69
Tomato-starch-cheese canned specialties	1.87	1.08	0.72

(b) The following limitations establish the quantity of TSS controlled by this section, which may be discharged by a “medium” or “large” existing point source subject to the provisions of this subpart after application of the best practicable control technology currently available. Any food specialty plant which continuously or intermittently discharges process waste water during the processing season shall meet the annual average, maximum thirty day average, and maximum day TSS limitations. Food specialty plants employing long term waste stabilization, where all or a portion of the process waste water discharge is stored for the entire processing season and released at a controlled rate with state approval, shall meet only the annual average TSS limitations. Effluent limitations for the soups subcategory are based upon pounds (lb) or kilograms (kg) of pollutant per 1000 pounds (lb) or kilograms (kkg) of raw ingredients.

Environmental Protection Agency

Pt. 408

[Metric units, kg/kg of final product; English units, lb/1,000 lb of final product]

Commodity (specialties)	TSS effluent limitations		
	Maximum for any 1 day	Average of daily values for 30 consecutive days shall not exceed—	Annual average shall not exceed—
Added ingredients	0.00	0.00	0.00
Baby food	2.23	1.55	0.95
Chips:			
Corn	2.90	2.17	1.53
Potato	6.25	4.49	2.97
Tortilla	4.34	3.11	2.04
Ethnic foods	4.23	2.91	1.73
Jams/jellies	0.76	0.54	0.36
Mayonnaise and dressings	0.67	0.49	0.33
Soups	7.38	5.09	3.10
Tomato-starch-cheese canned specialties	3.31	2.23	1.30

(c) The following limitations establish the quality of pH controlled by this section, which may be discharged by a “medium” or “large” existing point source subject to the provisions of this subpart after application of the best practicable control technology currently available.

Effluent characteristic	Effluent limitations
Oil and grease	Shall not exceed 20 mg/l.
pH	At all times within the range 6.0 to 9.5
pH	At all times within the range 6.0 to 9.5

[41 FR 16284, Apr. 16, 1976, as amended at 60 FR 33939, June 29, 1995]

§ 407.83 [Reserved]

§ 407.84 Pretreatment standards for existing sources.

Any existing source subject to this subpart that introduces process wastewater pollutants into a publicly owned treatment works must comply with 40 CFR part 403. In addition, the following pretreatment standard establishes the quantity or quality of pollutants or pollutant properties controlled by this section which may be discharged to a publicly owned treatment works by any existing point source subject to the provisions of this subpart.

Pollutant or pollutant property	Pretreatment standard
BOD5	No limitation.
TSS	Do.
Oil and grease	Do.

[41 FR 16281, Apr. 16, 1976, as amended at 60 FR 33939, June 29, 1995]

§ 407.85 [Reserved]

§ 407.86 Pretreatment standards for new sources.

Any new source subject to this subpart that introduces process wastewater pollutants into a publicly owned treatment works must comply with 40 CFR part 403. In addition, the following pretreatment standard establishes the quantity or quality of pollutants or pollutant properties controlled by this section which may be discharged to a publicly owned treatment works by a new point source subject to the provisions of this subpart.

Pollutant or pollutant property	Pretreatment standard
BOD5	No limitation.
TSS	Do.
Oil and grease	Do.

[41 FR 16281, Apr. 16, 1976, as amended at 60 FR 33939, June 29, 1995]

§ 407.87 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best conventional pollutant control technology (BCT).

Except as provided in §§ 125.30 through 125.32, any existing point source subject to this subpart shall achieve the following effluent limitations representing the degree of effluent reduction attainable by the application of the best conventional pollutant control technology (BCT): The limitations shall be the same as those specified for conventional pollutants (which are defined in § 401.16) in § 407.82 of this subpart for the best practicable control technology currently available (BPT).
